About iZOOlogic	07

Attackers are constantly improving their breach abilities through disguises such as crypto-jacking, polymorphism, and encryption to have their malicious presence within weak security environments. Sophisticated malware and phishing attacks have wreaked havoc

across the world, and there is an imminent need for organizations to have complete visibility of their internal and external security landscapes. The consequences are way too detrimental, including but not limited to:

1

Online brand abuse and reputational risk results from phishing and malware attacks.

2

Cybercriminals exploit the business via the Dark Web, presenting unique challenges.

3

Social engineering uses the corporate brand and targets the executive staff leading to Business Email Compromise and APT attacks.

Why NuSummit Cybersecurity + iZOOlogic?

iZOOlogic and NuSummit Cybersecurity offer solutions against the aforementioned threat landscape through a suite of real-time monitoring services and provide an integrated and seamless incident management. The combined solutions and

services will enable enterprises to manage their online security strategies, provide assurance and integrity, reduce fraud risk, maintain compliance, establish trust, and ensure the protection of the online brand reputation.

Brand Monitoring Suite

Tracks mentions of your organization online to identify potential brand abuse or infringement. Our team of experts can continuously monitor your security posture and protect your intellectual property, infrastructure, critical assets, and brand reputation.

- Brand Reputation Monitoring
- Social Media Monitoring
- Mobile App Impersonation Monitoring
- Executive Monitoring

Anti-Phishing

Mitigates the risk of phishing attacks by detecting and blocking fraudulent emails designed to steal sensitive information. 24x7 Real time identification of compromised accounts integrated with NuSummit Cybersecurity' MSSP service offerings.

Data loss Recovery from Dark Web

Protects sensitive data from unauthorized access or disclosure

Threat Intelligence and Response

Provides insights into emerging threats and vulnerabilities to help organizations proactively defend their systems.

Partnership Highlights

As a premier Managed Security Services Provider, NuSummit Cybersecurity collaborates with iZOOlogic to deliver unparalleled solutions 24x7 from the ISO

certified Cyber Defense Centers (CDC) for diverse industry verticals in North America, India and the Middle East.

Unified Threat Management

- Seamless 24x7 CDC Integration
- Unified threat response portal
- Real time threat alerts and risk mitigation assistance via email/SMS/API/webservices
- Threat Categorisation
- Dynamic and Static risk Analysis
- Forensic and Data Recovery

Risk Mitigation

- Real time identification of compromised high valued accounts
- URL Blacklist Broadcast
- Website threat protection by mitigating Phish Sites and Baiting
- Data Recovery from the Dark Web
- Mobile app impersonation takedown with App stores

Legal Enforcement

- Site Take Down via Administrative Process
- Trademark and Copyright law
- Expert enforcement and legal team

Key Collaborative Strengths

Trained and Certified Professionals

- Over 200 trained and certified professionals ensure excellence in every deployment.
-

Industry Focus

- Tailored solutions for various sectors, addressing unique MDR challenges and regulatory landscapes.
 - Demonstrated success stories in BFSI, Telecom, Manufacturing, Pharma, and beyond.
-

Continuous Monitoring and Threat Management

- 24x7x365 monitoring, baselining, anomaly detection and security incident response .
 - Yearly, quarterly, and monthly threat-con reviews.
 - Single pane visibility through in-depth dashboards.
 - Industry-specific curated threat intelligence for anomaly detection and use-case enrichment.
-

Enhanced Threat Readiness

- Situational awareness through threat intelligence, threat modeling and threat hunting .
 - Maintenance and operation of security monitoring infrastructure.
-

Regulatory and Compliance Assurances

- Incident response is aligned to the NIST Cybersecurity Framework's five pillars:
- Identify, Protect, Detect, Respond and Recover.

Joint Success Stories

NuSummit Cybersecurity Cyber Defence Centre (CDC) powered by iZOOlogic played a crucial role in helping an online payment platform recover customer login credentials that had been stolen and leaked on the dark web. The breach occurred when hackers used phishing tactics to obtain the sensitive data and subsequently uploaded it to an internet forum. By actively monitoring the dark web, NuSummit Cybersecurity CDC swiftly identified the leak and retrieved the compromised information.

This timely intervention enabled the platform to take prompt action and safeguard its customers

About iZOOlogic

iZOOlogic is dedicated to providing niche online Brand Protection, Anti-Phishing and Anti-Fraud solutions. The iZOOlogic platform is an integrated suite of services allowing real time intelligence into the online threat landscape and provides a seamless 24x7x365 Global Incident Response. iZOOlogic is headquartered in the UK, with operations in US and Australia, and protects corporate and government clients across the world.

Unlock the potential of your MDR journey with NuSummit Cybersecurity and iZOOlogic.

About NuSummit Cybersecurity

NuSummit Cybersecurity helps build and transform cybersecurity postures to enable businesses to mitigate risks. We are a pure-play cybersecurity services company with deep expertise in Identity and Access Management, Risk Advisory, Security Verification, Managed Detection and Response, and Security Engineering services.

Our unique products and services help businesses build and transform security postures while mitigating risks. Our focus is to strengthen security resilience by minimizing the occurrence of attacks, threats, and risks so that you can drive change, innovate, and accelerate growth.
